HONEYWELL DEVELOPS FIRE ALARM POWER SUPPLIES FOR CONTINUOUS DUTY APPLICATIONS

More Power Now Available for Fire System Accessories

NORTHFORD, CT — Honeywell (NYSE:HON) Power Products has developed three series of power supplies to support fire system installations requiring constant duty power. The HP-ULM series, HP-ACM series, and HP-ULPD series provide continuous power for fire alarm accessory operation including fire door locks, fan shutdown, elevator recall, magnetic door holders and more. Installers typically use these three series in access control applications, and now they are qualified to fulfill UL (Underwriters Laboratories) requirements for fire alarm power supplies as well.

These power supplies deliver 2.5, 4 or 6 amps (depending on model) of continuous power to a large majority of today's fire alarm system accessories. Each unit features electronically regulated & field selectable 12VDC or 24VDC output that is fully filtered and an automatic switchover to standby battery should AC power fail.

Honeywell's Voice-of-the-Customer product development process rapidly identified and implemented key features preferred by experienced installers, such as bigger enclosures for more wiring room, easy programming with jumpers and DIP switches, and rapid serviceability through LED diagnostic indicators. All of these Honeywell power supplies provide circuit-breaker battery protection; AC fail and battery monitor supervision contacts, and a built-in charger for sealed lead-acid or gel-type batteries.

Visit www.honeywellpower.com for a comprehensive library of data sheets, installation manuals, CAD (computer aided design) files, and voltage drop calculators covering

Honeywell's complete line of power supplies. To reach Honeywell Power Products by phone, call toll-free 877-HPP-POWR (877-477-7697).

EDITOR'S NOTE: Attached is a high-resolution image your publication is welcome to utilize in connection with this release. Please direct all leads for Honeywell Power Products to Communications Manager Kris Bylan-Rydel at kristen.bylan-rydel@honeywell.com.

Honeywell Power Products, part of the Honeywell Life Safety Group, designs and manufactures high-quality power solutions for access control, fire, intrusion and video applications. From small plug-in transformers to large systems power supplies, information on Honeywell's complete power portfolio is available online at www.honeywellpower.com.

Honeywell International is a \$33 billion diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials. Based in Morris Township, N.J., Honeywell's shares are traded on the New York, London and Chicago Stock Exchanges. It is one of the 30 stocks that make up the Dow Jones Industrial Average and is also a component of the Standard & Poor's 500 Index. For additional information, please visit www.honeywell.com.
