HONEYWELL BUILDS *POWERFUL* PRODUCT REFERENCE WEBSITE

Power Products Documentation Library and Product Finder Prove Essential Internet Reference Tools

NORTHFORD, CT — Honeywell (NYSE:HON) Power Products has launched a new website at www.honeywellpower.com giving customers multiple ways to acquire power supply information quickly.

A lengthy library of data sheets, installation manuals, CAD (computer-aided design) files, and even Agency (CSA, CSFM, UL, FM, MEA) approvals provides visitors numerous ways to locate and download information easily. The unique product finder allows users to sort and search the complete Honeywell Power Products' portfolio via an alphanumeric list, product category, market application, voltage output or keyword.

Unlike most web-based product references, www.honeywellpower.com is designed to provide an enhanced level of multi-criteria searchability. An online request form and comprehensive contacts page offers an easy means for ordering handy reference materials. Product brochures and *Applications Guide* binders or CD-ROMs containing data sheets, cross reference charts and other product specification information are available for prompt delivery - all free of charge. Visitors can also locate where to purchase Honeywell power supplies, and sign-up to receive special offers and new product information as a member of the Contact Club.

"We put a lot of time and thought into the design of this website. We used dynamic JavaScript menu code that'll make updating faster and easier. There's a great deal of technical information on this site and it probably has the most powerful search capabilities of any site we've built to-date," says Pam Frost, Honeywell Power Products' Web Master.

Visit www.honeywellpower.com to see all that this online reference tool offers. To reach Honeywell Power Products by phone, call 877-HPP-POWR (877-477-7697).

EDITOR'S NOTE: Attached is a high-resolution image your publication is welcome to utilize in connection with this release.

Honeywell Power Products, part of the Honeywell Life Safety Group, designs and manufactures high-quality power solutions for access control, fire, intrusion and video applications.
